

PRATHAMESH RANE

Mumbai, India | ranepathamesh22@gmail.com | +91 93215 40450 |

PROFESSIONAL SUMMARY

Full-stack developer skilled in React, Next.js, Node.js, and MongoDB, with additional experience in Flutter and Python-based data projects. Built and shipped a patent-pending mobile app (Scan-to-Know) and automated lead-enrichment workflows using Clay.com. Seeking a full-stack or software engineering role to apply and grow these skills in production environments.

TECHNICAL SKILLS

- **Programming:**
Python, JavaScript, SQL, Dart
- **Web Development:**
HTML, CSS, React, Node.js, Express.js
- **Database Management:**
MySQL, MongoDB, Excel
- **Frameworks:**
Next.js, Angular.js, Flutter
- **Tools:**
Git, GitHub, Microsoft Office, Clay.com, Figma

EDUCATION

K.C. College of Engineering & Management Studies

Bachelor's in Engineering in Information Technology & Minor Specialization in Data Science

November 2022 – May 2026 | Mumbai | CGPA: 8.46

K.J. Somaiya College of Science & Commerce

HSC | August 2020 – April 2022 | Mumbai | Percentage: 72.00

Cosmos High School

SSC | March 2020 | Mumbai | Percentage: 91.20

EXPERIENCE

- **Content/QA Intern RK-DEMY | (June 2024 – July 2024)**
 - Curated and uploaded question banks into the application backend/CMS using structured documentation and answer keys, ensuring content accuracy.
 - Assisted with basic AWS tasks to support content deployment and storage.

PROJECTS

Scan-to-Know | (Patent Published | 2nd Place Intercollegiate Winner | Avishkar finalist)

- Developed a mobile application that scans food product barcodes and labels to provide nutritional insights, ingredient analysis, Nutri-Score, NOVA classification, and a Consumer Product Health Score (CPHS). Integrated OCR and product APIs with a centralized MongoDB backend to help users make healthier and informed food choices.

Automated Lead Enrichment & Outreach (Clay.com)

- Built an automated outreach system using Clay.com to identify and email marketing executives and senior leadership at recently-funded Indian companies, using Claygent-powered enrichment columns (Budget Trigger, New Hire Trigger, Expansion Trigger) to personalize messaging based on funding signals

Flutter-App with Firebase

- A food delivery application built with Flutter and Firebase, featuring smooth and responsive UI, user authentication, food browsing, category-based navigation, cart management, and seamless order placement with real-time data handling.

Rainfall Predictor (Using XG Boost)

- Developed a rainfall prediction model using XGBoost for accurate forecasting. Preprocessed real-world weather data and achieved high prediction accuracy through feature engineering and model tuning.

Milk Adulteration Detection (IoT Project)

- Designed an IoT-based system using ESP32 to detect milk adulteration via pH and turbidity sensors. Streamed real-time data to Firebase and displayed results on a locally hosted web interface for instant monitoring.

Personal Portfolio Website

- Designed and deployed a personal portfolio website showcasing projects, skills, and contact information, built with Next.js and hosted on Vercel

Portfolio: <https://myportfolioweb-mocha.vercel.app/>
