+91 93215 40450

Mumbai, Maharashtra

Summary

Aspiring developer with hands-on experience in Web development, Flutter and native Android applications, Data Analysis. Passionate about creating user-friendly digital experiences and continuously learning to transform innovative ideas into real-world solutions.

Skills

Programming

Python, JavaScript, SQL, Dart

Web Development

HTML, CSS, React, Node.js

Database Management

MySQL, MongoDB, Excel

Version Control

Git, GitHub

Frameworks

Next.js, Angular, Flutter

Projects

Scan-to-Know | (Patent approved | 2nd Place Intercollegiate Winner | Avishkar finalist)

Developed a mobile application that scans food product barcodes and labels to provide nutritional insights, ingredient analysis, Nutri-Score, NOVA classification, and a Consumer Product Health Score (CPHS). Integrated **OCR** and product APIs with a centralized **MongoDB** backend to help users make healthier and informed food choices.

Flutter-App with Firebase

A food delivery application built with Flutter and Firebase, featuring smooth and responsive UI, user authentication, food browsing, category-based navigation, cart management, and seamless order placement with real-time data handling.

Rainfall Predictor (Using XG Boost)

Developed a rainfall prediction model using XGBoost for accurate forecasting. Preprocessed real-world weather data and achieved high prediction accuracy through feature engineering and model tuning.

Milk Adulteration Detection (IoT Project)

Designed an IoT-based system using ESP32 to detect milk adulteration via pH and turbidity sensors. Streamed real-time data to Firebase and displayed results on a locally hosted web interface for instant monitoring.

Education

Bachelor of Engineering in Information Technology

K.C. College of Engineering & Management Studies & Research | 2022 - 2026

CGPA: 8.46

Honours Minor Degree in Data Science

Percentage: 65.00 %
